Dear all,

Greetings of the festival of lights, Diwali!

This year has been a year of major changes which took place in the editorial board of Wadia Journal of Women and Child Health in view of the indexing and abstracting.

The board meeting was conducted on October 22, 2024, where plan of action for future issues was made and major discussion regarding special supplementary editions was discussed to have focused readership with enhanced circulation among the peer groups for better understanding of new and upcoming topics in pediatrics and women health.

Medical knowledge is expanding fast and with leaps and bounds. The era of artificial intelligence is a new upcoming era for knowledge seekers as we have taught everything to machines which our brain knows. The real challenge will come in the coming time when actual utilization of that knowledge will aid clinician in the day-to-day practice of medicine, especially those working in women and child health as these are the subgroups with special needs and aid.

We thank all our authors, readers, reviewers, editorial board members, present and past, for their continuous support.

Happy reading!
