CEO's message

As we conclude 2025 and enter the Centenary year for Wadia Hospitals, it gives us immense pleasure to release the special issue on Clinical Genetics.

Genetic disorders in women and children have complex etiologies and need a multi-disciplinary approach. We are fortunate that Bai Jerbai Wadia Hospital for Children has been always at the forefront in diagnosis, treatment, curative, and rehabilitative services. The first national rare diseases conference was held at Bai Jerbai Wadia Hospital for Children in March 2025.

I would like to thank and congratulate our authors, editorial team members, and the publisher. I also want to thank invited editors who conceptualized and brought out this special issue on Clinical Genetics

We take this opportunity to thank all the stakeholders of Wadia Hospitals and, importantly, our patients for whom this is not just a hospital, but a feeling of being taken care of at home, and wish everyone a grand success.

Dr. Minnie Bodhanwala,
Chief Executive Officer,

Bai Jerbai Wadia Hospital for Children and Nowrosjee Wadia Maternity Hospital, Mumbai,
Maharashtra, India.
